

Zip Econoboil[®]

Over-sink instant boiling water
for temporary buildings and short term tenancies

3.0 litre, 5.0 litre

Features

Basic heaters for locations where economy is important

Boiling water for tea, coffee and cooking

Designed to operate within 1°C of boiling point

Robust construction in corrosion-resistant white powder coated steel

Delivery rate

Up to 45 cups at a time

Recovery rate

Up to 140 cups/hour

Zip Econoboil®

Over-sink instant boiling water

Product Selection Chart

Description

- Twin chamber instant boiling water heaters
- White powder coated steel
- Chrome plated brass external two-way tap
- Capacity: 3.0, 5.0 litre
- Copper boiling chamber
- Temperature controls that will automatically cut off the power in the event of temperature control failure, water supply failure or a blocked vent pipe

Heating element

Long-life incoloy-sheathed embedded rod.

Insulation

Tontine.

Thermostat

Capillary type.

Approvals

WRAS approval and CE Endorsed.

Warranty

One-year on site parts and labour. For full details of the Zip Warranty Scheme visit: www.zipheaters.co.uk/warranty.

Installation

Location

Should be installed over a draining board, or over a work top fitted with a drip tray — tap spout should be no higher than necessary to fill large pots.

Plumbing

Designed for connection to a potable cold water supply with a minimum pressure of 1 bar and a maximum pressure of 7 bar. A pressure reducing valve to be fitted if pressure is greater than 7 bar.

An isolating valve should be installed between the supply and the heater.

For concealed connections, connect inlet and vent pipes from the rear via 15mm elbows.

For exposed connections, connect inlet and vent pipes from the bottom directly to 15mm compression fittings with nuts and olives provided.

Venting

The vent must discharge to a safe visible position as, under certain conditions, the vent may discharge cold or boiling water and/or steam.

The vent pipe outlet must be connected via a tundish to a 15mm copper vent pipe which has a continuous fall, is no more than 3 metres long, and has no more than 3 right angle bends.

The bug screen supplied must be fitted to the end of the vent tube.

Electrical

To be wired to a double pole fused spur, minimum break rating of 13 amps.

For concealed electrical connection, connect a fixed or flexible cable from the rear directly to the terminal block.

Installation must comply with current IEE regulations.
